PROFILE

Systems Engineering student (9th semester) and co-founder of **Skyonetec**, where I design and build the entire product line: **18 systems** across web, desktop and mobile, from emergency management for a fire department to real-time GPS tracking. My core is **Java 17 and Spring Boot 3**. I use AI (LLMs, MCP, coding agents) both inside the products and in the way I build software. **Looking to join a development team as a Java backend developer**, alongside Skyonetec.

EXPERIENCE

Skyonetec · Co-founder & Lead Developer

2024 — PRESENT

End-to-end architecture and development of the company's products, including deployment and operations.

- **SkyGuard**, a platform for a fire department: checklist inspections, PDF certificates with publicly verifiable QR codes, emergency logging with response times, fleet management and executive dashboards.
Spring Boot · Spring Security · MySQL · OpenHTMLtoPDF · ZXing
- **SkyGPS**, vehicle tracking: custom TCP server that ingests GPS device frames, real-time monitoring, route history and PDF/Excel reports.
Spring Boot · Netty · MySQL · Docker
- **SkyScan**: Android app that turns a phone into a barcode scanner, plus a cross-platform desktop server. It replaced an unstable VB.NET solution, with zero unexpected crashes since.
Kotlin · Jetpack Compose · CameraX · ML Kit · .NET 8 · Avalonia
- **SkyMeet**: desktop app that turns meeting recordings into PDF minutes, transcribed and summarized with AI.
.NET 8 · WPF · OpenAI · SQLite
- Also: inventory and sales ERP with forecasting (Orbital), e-commerce synced with inventory, CRM with OCR, fleet management, education platforms and LLM chatbots.
- Deployment on Linux servers with Docker and Plesk. AI-agent-assisted development driven by specs used as contracts.

Matrix SQL · ERP Support

MAY — AUG 2024

User support and incident handling for a business ERP, with direct exposure to real accounting, inventory and sales processes.

Self-taught programming

2018 — 2023

Started with basic C++ in 2018. In 2020 I taught myself Java and then Spring Boot, building personal projects that led to production systems from 2024.

TECH STACK

Backend	Java 17, Spring Boot 3, Spring Security, Spring Data JPA, Thymeleaf, REST APIs, Netty
Data	MySQL, SQLite
Mobile / desktop	Kotlin, Jetpack Compose, .NET 8 (WPF, Avalonia)
AI	OpenAI and Claude APIs, LLMs, MCP, Python, coding agents
DevOps	Docker, Git, Linux, Plesk
Documents	iText, OpenHTMLtoPDF, Apache POI, ZXing
Frontend	HTML, CSS, JavaScript

EDUCATION

Systems Engineering
Universidad de la Costa (CUC), Barranquilla
9TH SEMESTER · IN PROGRESS

LANGUAGES

Spanish · native
English · A2, actively improving
Comfortable reading technical documentation.
